

CHANCHAL MAITY

AI-NATIVE PRODUCT ENGINEER

Full-Stack | Mobile | Backend

CONTACT

Phone: +91 99329 15707

Email: chanchal@aaspasindia.com

Portfolio: <https://chanchal.aaspasindia.com>

Location: Contai, East Midnapore, West Bengal 721427

Languages: Bengali, Hindi, English

SPECIALITY SNAPSHOT

- React Native mobile apps
- Node.js + MongoDB systems
- Realtime Socket.IO products
- Payments, maps, calling
- Native Android behavior
- IoT hardware-to-cloud
- AI-assisted engineering

TECHNICAL STACK

Mobile: React Native, Expo, Flutter, TypeScript, Java

Web: Next.js, React, Tailwind CSS, Bootstrap, Framer Motion

Backend: Node.js, Express.js, MongoDB, Mongoose, JWT

Python: scripting, automation, debugging, API utilities

Realtime: Socket.IO, WebSockets, Redis-style active state

Integrations: Razorpay, Maps, Agora, Firebase FCM, Twilio

Tools: Postman/API testing, Git/GitHub, npm, Vercel, Render

IoT: ESP32, relay control, schedules, heartbeat recovery

BEST FIT ROLES

- AI-Native Product Engineer
- Full-Stack Developer (React Native & Node.js)
- Mobile Product Engineer (Maps, payments, realtime)
- Backend & Automation Developer (Python/Node.js)

INTERESTS

- Movies and music
- Building new apps and product experiments
- Hardware-software ideas and device workflows
- Exploring new tools, APIs, and automation

Chanchal Maity

Full-Stack & Mobile Product Engineer

I build production-ready mobile, backend, realtime, IoT, and AI-assisted product systems end to end.

TOP SPECIALITY

Marketplace-grade apps with realtime state, payments, maps, native Android, and backend-owned correctness.

AasPas

customer + worker

Realtime

tracking + calls

IoT

ESP32 control

AI-native

verified delivery

PROFESSIONAL SUMMARY

3+ years building React Native, Flutter, Next.js, Node.js, Python scripting, MongoDB, Socket.IO, payments, maps, native Android, IoT, and AI-assisted products. Strongest proof: AasPas, a customer-worker marketplace with live tracking, in-app calling, payments, wallet/earnings, and admin-ready backend operations.

EXPERIENCE

Founder & Lead Product Engineer - AasPas India

2024 - Present

CPJ Solution | React Native, Node.js, MongoDB, Socket.IO, Razorpay, Maps, Agora, FCM, Native Android

- Built customer and worker flows: discovery, booking, acceptance, tracking, payments, wallet, reviews, support, and admin visibility.
- Integrated Socket.IO tracking, Razorpay, Maps, Firebase FCM, Agora calling, and Android full-screen booking/call flows.
- Owned backend correctness for booking state, payment status, worker earnings, commission, wallet records, and recovery.

Technical Integration Specialist - Brightex Solutions Pvt. Ltd.

2023 - 2024

Device performance + software-hardware integration

- Optimized device performance and component-level software-hardware integration workflows.

TRC Engineer, QC Department - Aforeserve.com LTD

2022 - 2023

Lenovo service workflow

- Diagnosed Lenovo device quality issues and strengthened hardware-aware debugging discipline.

Freelance Full-Stack Developer - NDA Clients

2025 - Present

Business automation | secure mobile apps | API integrations

- Delivered 15+ NDA projects across automation, secure app workflows, backend APIs, and integrations.

FLAGSHIP PRODUCT WORK

AasPas

Live tracking, native calls, payments, wallet/earnings, reviews, AI help, and admin ops.

AasPas Smart Box

ESP32 relay control, timers, schedules, energy analytics, heartbeat, fallback, and power recovery.

Private Theater

Host playback, room links, chat, WebRTC voice, and multi-source video support.

Commerce + Mobile Systems

Ecommerce, telephony, imaging, auth, admin tools, API flows, and polished mobile UX.

EDUCATION & CERTIFICATIONS

Full-Stack Software Engineering Certificate

2023

Meta / Coursera - Advanced JavaScript, React, backend development

Diploma in Computer Hardware & Networking

2020 - 2022

The George Telegraph Training Institute

Higher Secondary (HS)

2020

Nachinda Jibankrishna High School - 85.4%

CORE STRENGTHS

- End-to-end product ownership across mobile apps, backend APIs, realtime systems, payments, maps, and admin workflows.
- Version-controlled delivery with Git/GitHub, API testing, deployment workflows, and clean iteration habits.
- Hardware-aware engineering mindset from TRC/Brightex experience and IoT experimentation.

Portfolio focus: mobile, backend, realtime, payments, native Android, IoT, and AI workflows.
